

Pyranometry, Pyrliometry, and Broadband Albedo WG

John Augustine, Kathy Lantz, Carlo Wang, Fred
Denn, Allison McComiskey, Gary Hodges,
Laurent Vuilleumier, Tom Kirk, Joe Michalsky

Possible albedo experiments:

Change tower height to understand the effect

Side viewing albedo measurement

Heterogeneity

Pyranometry & Pyrliometry

Another VCPC (direct)– smaller and shorter

Include new instruments, RSRs, COFOVO, older model instruments

A VCPC for pyranometers – maybe global and diffuse; need good direct and diffuse. Ancillary measurements to include T, RH, WS/WD, infrared; both hazy and clear conditions

Carlo volunteered for hazy locale

New WG Chair (or else!)

- A new chair is needed or this broadband shortwave working group will be suspended by the project manager
- Talk to Chuck or me if you are interested
